

Support, Help & Integration in Perthshire
for young people with additional support needs

PERSONAL CARE (COVID-19 PROTOCOL)

This document outlines the additional steps staff will take in relation to personal care during the coronavirus outbreak.

Staff will continue to follow the personal care policy SHIP currently has in place, with the addition of following additional steps.

Staff will only allow one child at a time to use the toilet facilities. The area will be cleaned using disinfectant spray and disposable paper towels after use: this includes toilet seats, sinks and hand dryer and door handles. This will be done after every use.

Should a young person require support with their personal care, staff will wear appropriate PPE (gloves, apron, mask/visor) as outlined in the personal care policy. Changing beds, hoists, door handles, sinks, taps, other surfaces and any supplies used will be cleaned after each use using the appropriate disinfectant spray.

One member of staff will complete the personal care record to reduce risk of cross contamination.
